Joe's Law - Joe ARPAIO 2008-05-29

Outspoken, no-nonsense, and eminently fascinating, Joseph M. Arpaio captured the public's imagination from his first day as sheriff of Maricopa County, Arizona, in 1992. He has become an icon, not only in his own state, but all over the world. For 15 years, he has maintained an unprecedented 80% approval rating. Famous for his “get smart and get tough” approach to jails, “Sheriff Joe,” as he is universally known, conceived The Tent City Jail where he houses his inmates in surplus army tents left over from the Korean War. Known as the “Alcatraz of Arizona,” the jail features chain gangs and stringent discipline. By eliminating all comforts for his inmates, he has managed to shave \$500,000 annually from the cost of keeping prisoners. But he also offers a wide range of educational and therapeutic courses for inmates. To his ardent followers, he is a hero for both his toughness on crime and his sense of humanity. While his opponents decry him for his iron-fisted

approach, no one can deny that Sheriff Joe is one of the country's most respected elected officials. Joe's Law is an uncensored look by “America's Toughest Sheriff” at some of the most important and difficult issues facing America today. As the first law enforcement official in the country to arrest illegal immigrants, Arpaio tackles illegal immigration head on—how it intertwines with drug trafficking, taxes, and crime, and how it impacts healthcare and education as well. Arpaio offers innovative and fair ways to solve this dilemma and many others, not only in his own state but throughout the country. Compelling and courageous, this is a candid take on some of America's most pressing social problems, and one man's revolutionary vision for eliminating them.

Crime Control and Women - Susan L. Miller 1998-02-12

The Relativity of Deviance - John Curra 2011
In this Second Edition of his investigation into the relative nature of social deviance and how the public perceives it, author John Curra demonstrates that what qualifies as deviance varies from place to place, time to time, and situation to situation. Through thought-provoking examples that include the blue people of Kentucky, a woman who believes she is a vampire, autoerotic asphyxiators, and others, Curra illustrates that deviance cannot be explained in terms of absolutes, nor can it be understood apart from its social setting. This insightful book approaches sex, violence, theft, suicide, drugs, and mental disorders in such a way that definitive or objective judgments become impossible.

Drugs and Drug Policy - Clayton J. Mosher 2007

Drugs and Drug Policy: The Control of Consciousness Alteration provides a cross-national perspective on the regulation of drug use by examining and critiquing drug policies in the United States and abroad in terms of their scope, goals, and effectiveness. In this engaging text, authors Clayton J. Mosher and Scott Akins discuss the physiological, psychological, and behavioral effects of legal and illicit drugs; the patterns and correlates of use; and theories of the "causes" of drug use. Key Features: * Offers more coverage of drug policy issues than

competitive books: This book addresses the number of significant developments over the last few decades that suggest the dynamics of drug use and policies to deal with drug use are at a critical juncture. The book also considers the issue of "American exceptionalism" with respect to drug policies through a detailed analysis of emerging drug policies in other Western nations. * Makes explicit comparisons between legal and illegal drugs: Due to their prevalence of use, this book devotes considerable attention to the use and regulation of legal drugs in society. The book illustrates that commonly prescribed medications are similar to drugs that are among the most feared and harshly punished in society and that drug-related problems do not necessarily result from particular drugs, but from how drugs are used. * Includes many pedagogical tools: With chapter opening photos and more photos throughout, this text presents material in a student- friendly fashion. Highlight boxes provide interesting examples for readers;

encourage further emphasis on issues; and serve as important topics for in class writing exercises. In addition, Internet exercises and review questions reinforce key points made in the chapter and prompt classroom discussion.

For 40 years, this classic text has taken the issue of economic inequality seriously and asked: Why are our prisons filled with the poor? Why aren't the tools of the criminal justice system being used to protect Americans from predatory

business practices and to punish well-off people who cause widespread harm? This new edition continues to engage readers in important exercises of critical thinking: Why has the U.S. relied so heavily on tough crime policies despite evidence of their limited effectiveness, and how much of the decline in crime rates can be attributed to them? Why does the U.S. have such a high crime rate compared to other developed nations, and what could we do about it? Are the morally blameworthy harms of the rich and poor equally translated into criminal laws that protect the public from harms on the streets and harms from the suites? How much class bias is present in the criminal justice system - both when the rich and poor engage in the same act, and when the rich use their leadership of corporations to perpetrate mass victimization? The Rich Get Richer shows readers that much of what goes on in the criminal justice system violates citizens' sense of basic fairness. It presents extensive evidence from mainstream data that the criminal

justice system does not function in the way it says it does nor in the way that readers believe it should. The authors develop a theoretical perspective from which readers might understand these failures and evaluate them morally—and they to do it in a short text written in plain language. Readers who are not convinced about the larger theoretical perspective will still have engaged in extensive critical thinking to identify their own taken-for-granted assumptions about crime and criminal justice, as well as uncover the effects of power on social practices. This engagement helps readers develop their own worldview. New to this edition: Presents recent data comparing the harms due to criminal activity with the harms of dangerous—but not criminal—corporate actions Updates statistics on crime, victimization, incarceration, wealth, and discrimination Increased material for thinking critically about criminal justice and criminology Increased discussion of the criminality of middle- and

upper-class youth Increased coverage of role of criminal justice fines and fees in generating revenue for government, and how algorithms reproduce class bias while seeming objective Streamlined and condensed prose for greater clarity

The End of Policing - Alex S. Vitale 2021-12-07

The best-selling bible of the movement to defund the police in an updated edition The massive uprising that followed the police killing of George Floyd in the summer of 2020— by some estimates the largest protests in US history—thrust the argument to defund the police to the forefront of international politics. That case had been put persuasively a few years earlier in The End of Policing by Alex Vitale, now a leading figure in the urgent public discussion over policing and racial justice. The central problem, Vitale demonstrates, is the dramatic

expansion of the police role over the last forty years. Drawing on firsthand research from across the globe, he shows how the implementation of alternatives to policing—such as drug legalization, regulation, and harm reduction instead of the policing of drugs—has led to reductions in crime, spending, and injustice. This updated edition includes a new introduction that takes stock of the renewed movement to challenge police impunity and shows how we move forward, evaluating protest, policy, and the political situation.

SOU-CCJ230 Introduction to the American Criminal Justice System - Alison Burke 2019

Toward a Unified Criminology - Robert Agnew 2011-11

Why do people commit crimes? How do we control crime? The theories that criminologists use to answer these questions are built on a number of underlying assumptions, including those about the nature of crime, free will, human nature, and society. These assumptions have a fundamental impact on criminology: they largely determine what criminologists study, the causes

they examine, the control strategies they recommend, and how they test their theories and evaluate crime-control strategies. In *Toward a Unified Criminology*, noted criminologist Robert Agnew provides a critical examination of these assumptions, drawing on a range of research and perspectives to argue that these assumptions are too restrictive, unduly limiting the types of "crime" that are explored, the causes that are considered, and the methods of data collection and analysis that are employed. As such, they undermine our ability to explain and control crime. Agnew then proposes an alternative set of assumptions, drawing heavily on both mainstream and critical theories of criminology, with the goal of laying the foundation for a unified criminology that is better able to explain a broader range of crimes.

Drugs Without the Hot Air - David Nutt

tobacco by comparison? What are we missing by banning medical research into magic mushrooms, LSD and cannabis? Can they be sources of valuable treatments? The second edition of *Drugs without the hot air* looks at the science to allow anyone to make rational decisions based on objective evidence, asking: *What is addiction? Is there an addictive personality? *What is the role of cannabis in treating epilepsy? *How harmful is vaping? *How can psychedelics treat depression? *Where is the opioid crisis taking us?

Criminal Justice Policy and Planning - Wayne N. Welsh 2016-03-31

Unlike other textbooks on the subject, *Criminal Justice Policy and Planning: Planned Change*, Fifth Edition, presents a comprehensive and structured account of the process of administering planned change in the criminal justice system. Welsh and Harris detail a simple

yet sophisticated seven-stage model, which offers students and practitioners a full account of program and policy development from beginning to end. The authors thoughtfully discuss the steps: analyzing a problem; setting goals and objectives; designing the program or policy; action planning; implementing and monitoring; evaluating outcomes; and reassessing and reviewing. Within these steps, students focus on performing essential procedures, such as conducting a systems analysis, specifying an impact model, identifying target populations, making cost projections, collecting monitoring data, and performing evaluations. In reviewing these steps and procedures, students can develop a full appreciation for the challenges inherent in the process and understand the tools that they require to meet those challenges. To provide for a greater understanding of the material, the text uses a wide array of real-life case studies and examples of programs and policies. Examples

include policies such as Restorative Justice, Justice Reinvestment, Stop-and-Frisk, and the Brady Act, and programs such as drug courts, community-based violence prevention, and halfway houses. By examining the successes and failures of various innovations, the authors demonstrate both the ability of rational planning to make successful improvements and the tendency of unplanned change to result in undesirable outcomes. The result is a powerful argument for the use of logic, deliberation, and collaboration in criminal justice innovations.

Crime & Politics - Ted Gest 2003-08-07

Why has America experienced an explosion in crime rates since 1960? Why has the crime rate dropped in recent years? Though politicians are always ready both to take the credit for crime reduction and to exploit grisly headlines for short-term political gain, these questions remain among the most important-and most difficult to answer-in America today. In *Crime & Politics*, award-winning journalist Ted Gest gives readers

the inside story of how crime policy is formulated inside the Washington beltway and state capitols, why we've had cycle after cycle of ineffective federal legislation, and where promising reforms might lead us in the future. Gest examines how politicians first made crime a national rather than a local issue, beginning with Lyndon Johnson's crime commission and the landmark anti-crime law of 1968 and continuing right up to such present-day measures as "three strikes" laws, mandatory sentencing, and community policing. Gest exposes a lack of consistent leadership, backroom partisan politics, and the rush to embrace simplistic solutions as the main causes for why Federal and state crime programs have failed to make our streets safe. But he also explores how the media aid and abet this trend by featuring lurid crimes that simultaneously frighten the public and encourage candidates to offer another round of quick-fix solutions. Drawing on extensive research and including interviews with Edwin

Meese, Janet Reno, Joseph Biden, Ted Kennedy, and William Webster, *Crime & Politics* uncovers the real reasons why America continues to struggle with the crime problem and shows how we do a better job in the future.

Crime, Shame and Reintegration - John Braithwaite 1989-03-23

Clubland - Frank Owen 2004-06-08

Outrageous parties. Brazen drug use. Fantastical costumes. Celebrities. Wannabes. Gender-bending club kids. Pulse-pounding beats. Sinful orgies. Botched police raids. Depraved criminals. Murder. Welcome to the decadent nineties club scene. In 1995, journalist Frank Owen began researching a story on Special K, a designer drug that fueled the after-midnight club scene. He went to buy and sample the drug at the internationally notorious Limelight, a crumbling church converted into a Manhattan disco, where mesmerizing music, ecstatic dancers, and

uninhibited sideshows attracted long lines of hopeful onlookers. Owen discovered a world where reckless hedonism was elevated to an art form, and where the ever-accelerating party finally spun out of control in the hands of notorious club owner Peter Gatien and his minions. In *Clubland*, Owen reveals how a lethal drug ring operated in a lawless, black-lit realm of fantasy, and how, when the lights came up, their excesses left countless victims in their wake. Praised for his risk-taking and exhilarating writing style, Frank Owen has spawned a hybrid of literary nonfiction and true crime, capturing the zeitgeist of a world that emerged in the spirit of “peace, love, unity and respect,” and ended in tragedy.

Between Prison and Probation - Norval Morris 1991-09-12

Across the country prisons are jammed to

capacity and, in extreme cases, barges and mobile homes are used to stem the overflow. Probation officers in some cities have caseloads of 200 and more--hardly a manageable number of offenders to track and supervise. And with about one million people in prison and jail, and two and a half million on probation, it is clear we are experiencing a crisis in our penal system. In *Between Prison and Probation*, Norval Morris and Michael Tonry, two of the nation's leading criminologists, offer an important and timely strategy for alleviating these problems. They argue that our overwhelmed corrections system cannot cope with the flow of convicted offenders because the two extremes of punishment--imprisonment and probation--are both used excessively, with a near-vacuum of useful punishments in between. Morris and Tonry propose instead a comprehensive program that relies on a range of punishment including fines and other financial sanctions, community service, house arrest, intensive probation,

closely supervised treatment programs for drugs, alcohol and mental illness, and electronic monitoring of movement. Used in rational combinations, these "intermediate" punishments would better serve the community than our present polarized choice. Serious consideration of these punishments has been hindered by the widespread perception that they are therapeutic rather than punitive. The reality, however, Morris and Tonry argue, "is that the American criminal justice system is both too severe and too lenient--almost randomly." Systematically implemented and rigorously enforced, intermediate punishments can "better and more economically serve the community, the victim, and the criminal than the prison terms and probation orders they supplant." *Between Prison and Probation* goes beyond mere advocacy of an increasing use of intermediate punishments; the book also addresses the difficult task of fitting these punishments into a comprehensive, fair and community-protective sentencing system.

The Second Girl - David Swinson 2016-06-07
He's a good detective...with a bad habit. One of the best crime novels of 2016! - The New York Times Book Review, Booklist Frank Marr knows crime in Washington, DC. A decorated former police detective, he retired early and now ekes a living as a private eye for a defense attorney. Frank Marr may be the best investigator the city has ever known, but the city doesn't know his dirty secret. A long-functioning drug addict, Frank has devoted his considerable skills to hiding his usage from others. But after accidentally discovering a kidnapped teenage girl in the home of an Adams Morgan drug gang, Frank becomes a hero and is thrust into the spotlight. He reluctantly agrees to investigate the disappearance of another girl--possibly connected to the first--and the heightened scrutiny may bring his own secrets to light, too. Frank is as slippery and charming an antihero as you've ever met, but he's also achingly vulnerable. The result is a mystery of startling

intensity, a tightly coiled thriller where every scene may turn disastrous. **THE SECOND GIRL** is the crime novel of the season, and the start of a refreshing new series from an author who knows the criminal underworld inside and out. Don't miss Frank Marr's next case, **CRIME SONG**, out now!

Drugs, Crime and Public Health - Alex Stevens
2010-10-04

Drugs, Crime and Public Health provides an accessible but critical discussion of recent policy on illicit drugs. Using a comparative approach - centred on the UK, but with insights and complementary data gathered from the USA and other countries - it discusses theoretical perspectives and provides new empirical evidence which challenges prevalent ways of thinking about illicit drugs. It argues that problematic drug use can only be understood in the social context in which it takes place, a context which it shares with other problems of crime and public health. The book demonstrates

the social and spatial overlap of these problems, examining the focus of contemporary drug policy on crime reduction. This focus, Alex Stevens contends, has made it less, rather than more, likely that long-term solutions will be produced for drugs, crime and health inequalities. And he concludes, through examining competing visions for the future of drug policy, with an argument for social solutions to these social problems.

Death Nation - Matthew B. Robinson 2008

For courses in Capital Punishment, The Death Penalty, Policy Analysis/Policy Evaluation/Public Policy and Social Problems. Based on empirical evidence, *Death Nation* offers a fair and reasoned analysis of capital punishment as it is actually practiced in the United States. It includes a discussion of death penalty history, an analysis of the death penalty law and a discussion of various policy implications. Rather than present philosophical or moral arguments, it presents findings from a survey administered to dozens of capital punishment experts

throughout the United States. Included in the book are fact check sections that analyze these expert opinions for accuracy based on available empirical evidence.

Killer Triggers - Joe Kenda 2021-03-09

The most common triggers for homicide are fear, rage, revenge, money, lust, and, more rarely, sheer madness. This isn't an exact science, of course. Any given murder can have multiple triggers. Sex and revenge seem to be common partners in crime. Rage, money, and revenge make for a dangerous trifecta of triggers, as well. This book offers my memories of homicide cases that I investigated or oversaw. In each case, I examine the trigger that led to death. I chose this theme for the book because even though the why of a murder case may not be critical in an investigation, it can sometimes lead us to the killer. And even if we solve a case without knowing the trigger, the why still intrigues us, disrupting our dreams and lingering in our minds, perhaps because each of

us fears the demons that lie within our own psyche—the triggers waiting to be pulled. [The Biology of Desire](#) - Marc Lewis 2015-07-14
Through the vivid, true stories of five people who journeyed into and out of addiction, a renowned neuroscientist explains why the "disease model" of addiction is wrong and illuminates the path to recovery. The psychiatric establishment and rehab industry in the Western world have branded addiction a brain disease. But in *The Biology of Desire*, cognitive neuroscientist and former addict Marc Lewis

makes a convincing case that addiction is not a disease, and shows why the disease model has become an obstacle to healing. Lewis reveals addiction as an unintended consequence of the brain doing what it's supposed to do—seek pleasure and relief—in a world that's not cooperating. As a result, most treatment based on the disease model fails. Lewis shows how treatment can be retooled to achieve lasting recovery. This is enlightening and optimistic reading for anyone who has wrestled with addiction either personally or professionally.
