[Succeeding at Seminary](#) - Jason K. Allen 2021-04-06

Seminary is an important step toward ministry—but only when you make the most of it. Many seminarians finish their education with regrets and missed opportunities. They feel spiritually drained, they never connected with their professors or colleagues, they are plagued with a long list of "What ifs?," and worry they wasted this time. And many, as they enter the ministry, discover gaps in their education and are left thinking, If only my seminary had taught me that. Prepare for your calling and make the most of your theological training with Succeeding at Seminary.

Seminary president Jason K. Allen provides guidance for incoming and current seminary students on how to maximize their education experience. You'll learn how to select the right institution and weigh the pros and cons of online or in-person classes. You'll also receive tips for developing rapport with peers and professors and get insights for how to navigate a work, study, and family-life balance to help you survive the rigors of advanced theological learning. Seminary can offer the opportunities and education you need to flourish in ministry, but only if you are ready to make the most of it. With Succeeding at Seminary, you'll get the guidance and encouragement you need to maximize your seminary opportunity and excel in your calling.

Introduction to Radar Using Python and MATLAB - Lee Andrew (Andy) Harrison 2019-10-31

This comprehensive resource provides readers with the tools necessary to perform analysis of various waveforms for use in radar systems. It provides information about how to produce synthetic aperture (SAR) images by giving a tomographic formulation and implementation for SAR imaging. Tracking filter fundamentals, and each parameter associated with the filter and how each affects tracking performance are also presented. Various radar cross section measurement techniques are

covered, along with waveform selection analysis through the study of the ambiguity function for each particular waveform from simple linear frequency modulation (LFM) waveforms to more complicated coded waveforms. The text includes the Python tool suite, which allows the reader to analyze and predict radar performance for various scenarios and applications. Also provided are MATLAB® scripts corresponding to the Python tools. The software includes a user-friendly graphical user interface (GUI) that provides visualizations of the concepts being covered. Users have full access to both the Python and MATLAB source code to modify for their application. With examples using the tool suite are given at the end of each chapter, this text gives readers a clear understanding of how important target scattering is in areas of target detection, target tracking, pulse integration, and target discrimination.

When Faith Is Forbidden - Todd Nettleton 2021-03-02

Journey alongside Persecuted Christians Take a 40-day journey to meet brothers and sisters who share in the sufferings of Christ. When Faith Is Forbidden takes you to meet a Chinese Christian woman who called six months in prison "a wonderful time," an Iraqi pastor and his wife just eight days after assassins' bullets ripped into his flesh, and others from our spiritual family who've suffered greatly for wearing the name of Christ. Each stop on this 40-day journey includes inspiration and encouragement through the story of a persecuted believer. You'll also find space for reflection and a suggested prayer as you grow to understand the realities of living under persecution—and learn from the examples of the bold believers you'll meet. For more than 20 years, Todd Nettleton (host of The Voice of the Martyrs Radio) has traveled the world to interview hundreds of Christians who've been persecuted for the name of Christ. Now he opens his memory bank—and even his personal journals—to take you along to meet bold believers who will inspire you to a deeper walk with Christ.
