Essentials of Child and Adolescent Psychopathology - Linda Wilmshurst 2014-12-22

A concise guide to the fundamentals of child psychopathology, complete with the latest developments Essentials of Child and Adolescent Psychopathology, Second Edition provides a concise, accessible overview of the major theories, assessment practices, and key issues. This updated Second Edition describes the significant changes in the way DSM™-5 conceptualizes disorders in children and adolescents, and includes a new chapter on child abuse, child maltreatment, and self-injurious behavior. Using practical case examples to illustrate key points, the book addresses specific disorders and problems prevalent among this age group—including anxiety, mood disorders, and traumatic stress. Each chapter features reader-friendly elements like Rapid Reference, Caution, and Don't Forget boxes that call out important information, facilitating easy look-up and quick navigation. This invaluable resource fills the need for an overview of the most current issues and changes in the field, allowing readers to: Review the development, theories, and influences in child and adolescent psychopathology Understand neurodevelopmental disorders including intellectual and developmental disabilities, ADHD, and specific learning disabilities or disorders Compare and contrast the manifestations of internalized vs. externalized disorders Examine later-onset disorders and special topics including eating disorders, substance abuse, and trauma-related disorders The book also includes appendices on ethical conduct, assessment instruments, and IDEA 2004, providing readers the guidance and tools that can help increase positive outcomes. Whether used as a secondary text or as a professional reference, Essentials of Child and Adolescent Psychopathology, Second Edition provides an authoritative briefing on this evolving area of practice.

Eutrophication Management and Ecotoxicology - Martin C.T. Scholten 2006-03-30

This book bridges the gap between ecotoxicology and limnology, offering an ecotoxicological perspective on lake management. The text describes eutrophication of shallow, temperate lakes, and examines the influence of toxic substances on the aquatic ecosystem, and proposes that nutrients like phosphorus are not the only important factor in explaining and managing eutrophication. Draws on a range of studies and experiments, some presented here for the first time.

Danger on the Page - Brian Shawver 2015-04-07

Although fiction writers must concern themselves with "big picture" issues such as plot, theme, and character development, much of the day-to-day work of writing involves finding answers to seemingly minor questions: How should I describe the exterior of a house? How can I construct the voice of a historical narrator with authenticity? How should I depict a physically atypical character? Few books on the market

address the problems and opportunities present in these and other questions, yet they are the ones that most writers grapple with on a daily basis. *Danger on the Page: A Fiction Writer's Guide to Sex, Violence, Dead Narrators, and Other Challenges* identifies and explores some of the more common and intractable situational challenges of fiction writing, with chapters grouped into the general subject areas such as scenes, characters, points of view, and settings. Shawver delves into the pitfalls and opportunities of writing about sex, violence, sports, and love; he examines writing from the perspective of a different race, gender, or species; he interrogates conventional beliefs about the use of brand names, the description of architecture, and the portrayal of nature. Throughout, he gives dozens of examples from both literary and commercial fiction so readers can borrow (or reject) other writers' techniques and explore the myriad challenges of fiction writing on their own. A lively and witty approach to a diverse range of specific writing issues, Shawver's book will appeal especially to intermediate-level writers seeking to bring their craft to the next level.

Death Waits in the Dark - Mark Edward Langley 2020-08-04

It took all of thirty seconds for two shots to bring the world of Margaret Tabaaha crashing down around her. After losing her husband in Afghanistan during the first year of Operation Enduring Freedom, her two sons were all she had left. Now they had been taken from her violently, deliberately, plunging her into a whiskey bottle and stripping away her reason for living. When Arthur Nakai receives a call from his first love, Margaret, her voice pleading for his help, it comes as he is attending a wake for one of the men he considered a brother from his days in the Marines 6th LAR Wolf Pack Battalion. Feeling a deep and responsible obligation to help her, Arthur soon finds himself involved in the multi-billion-dollar world of the oil and gas industry and coming face-to-face with an old adversary, Elias Dayton. Their paths had crossed

when Arthur was a member of the Shadow Wolves, an elite tactical unit within US Customs and Border Protection. Now Dayton runs Patriot Security, a Blackwater-type firm that keeps the oil rigs, gas wells, and man camps secure from the Water Protectors, protesters pushing to stop the fracking and poisoning of Native lands. As Arthur works through the case from his end, Navajo police chief Jake Bilagody tackles it from another angle, looking into the strained relationship between the oil company and the Navajo people, all while searching for a missing Navajo man that may have become an unwilling piece on the reservation checkerboard. But when Arthur learns the identity of the boys' killer, he struggles to make sense of it. Because if the clues are right, he will be forced to make a decision that will haunt him for the rest of his life.

Clinical Guidelines for the Use of Buprenorphine in the Treatment of Opioid Addiction: Treatment Improvement Protocol Series (TIP 40) - U. S. Department of Health and Human Services 2013-06-27

This Treatment Improvement Protocol (TIP), Clinical Guidelines for the Use of Buprenorphine in the Treatment of Opioid Addiction, provides consensus- and evidence-based treatment guidance for the use of buprenorphine, a new option for the treatment of opioid addiction. The goal of this TIP is to provide physicians with information they can use to make practical and informed decisions about the use of buprenorphine to treat opioid addiction. These guidelines address the pharmacology and physiology of opioids, opioid addiction, and treatment with buprenorphine; describe patient assessment and the choice of opioid addiction treatment options; provide detailed treatment protocols for opioid withdrawal and maintenance therapy with buprenorphine; and include information on the treatment of special populations, e.g., pregnant women, adolescents, and polysubstance users. This TIP represents another step by the Center for Substance Abuse Treatment...

Ping-Pong Art and Literary Journal of the Henry Miller Library 2012 - Maria Garcia Teutsch 2021
Letter From the Editor, 2012 Dear Reader, Thank you for picking up this magazine. Inside you will find a world of wonders. If you are like most people you will flick through and look at the art first. We are proud to feature gallery prints from iconic photographer Kim Weston. The art editor and I met Kim a few years ago at the Henry Miller Library over dinner, and have been trying to get his beautiful photographs in our magazine ever since. It is thanks to the dogged tenacity of River Tabor that we are able to feature work by an astounding member of the Weston dynasty. Tim Youd did an entire art exhibit based on a passage out of Henry Miller's Tropic of Capricorn. We have a poem by Big Sur visitor and raconteur Richard Brautigan. This poem seems to embody the internal landscape of the author. We are fortunate to have so many talented people in the planisphere that is the Henry Miller Memorial library, and are happy to have so many West Coast writers and artists featured in this issue. The Library is an amazing cultural venue, a local's hang out, a bookstore, a concert venue, and a film theatre, but it is also a fragile watershed. Our commitment to keeping this delicate ecosystem in check is part of why this year we have launched into our capital fundraising campaign, in an effort to retrofit Emil White's little cabin into a place that hosts such acts as Thurston Moore of Sonic Youth. I met Thurston on a damp afternoon at the library. I am not an interviewer per se, but I do love listening to people's stories. Thurston Moore and I talked about poetry and art under a persimmon tree, the interview featured herein is the fruit... The East Coast is always well represented since half of our editors live in Brooklyn, which I like to call the poetry capital of the U.S. of A. We have the wondrous poets Leah Umansky, J. Hope Stein, Joanna Penn Cooper and Angela Wong featured. Enjoy!

overwhelmingly expresses the magic that suddenly pervades a small town, from the funny, folksy way the story is told to the imaginative, full-color illustrations.' Publishers Weekly Polacco's full-color pictures are completely in tandem with the telling' Booklist (starred review)

Clues in the Calico - Barbara Brackman 2009-05-01

In Clues in the Calico Barbara Brackman unveils a much-needed system for dating America's heirloom quilts. She tells how, by collecting and observing quilts and finally analyzing her computer file on close to 900 date-inscribed specimens, she arrived at the system. And through this telling she also imparts a colorful, stunningly illustrated history of quilting along with a good bit of entertaining social history and the newest findings in textile research.

Economic Analysis of Product Innovation - Manuel Trajtenberg 1990

One of the most striking features of contemporary industrial economies is their ability to offer an ever-expanding and improving range of products. Personal computers, tiny pacemakers, digital watches, and VCRs simply did not exist, and were not even dreamt of, only a few decades ago. Such product innovations play an increasingly important role in modern economic growth, and it is therefore imperative that economists come to grips with them, just as they have done with traditional economic phenomena. In this skillfully crafted and imaginative study, Manuel Trajtenberg develops the tools to quantify and analyze the notion of product innovation. He argues persuasively that the magnitude of an innovation should be equated with the social benefits that it generates. Drawing from the "characteristics approach" to demand theory and the econometrics of discrete choice, he presents an ingenious method to estimate the benefits from product innovations that accrue to the consumer over time. His method centers on consumer preferences for different product attributes - such as speed and size of memory in computers - and then uses those preferences to evaluate the changes in attributes. Trajtenberg applies his approach to the study of one of the most remarkable innovations in medical technology - Computed Tomography (CT) scanners. He assembled for that purpose an impressive set of data on every aspect of the new technology, from qualities and prices, patents and research, to details on virtually every sale in the United States during the decade following the introduction of CT in 1973. This close-up view of an innovation, quite rare in economic literature, offers valuable insights on the nature of the innovative process, the interaction between innovation and diffusion, the effects of uncertainty about quality, and the implications of changing preferences.

Free Radicals in Biology - William Pryor 2012-12-02

Free Radicals in Biology, Volume V covers the mechanisms for the generation of free radicals. This volume contains eight chapters that discuss the biology and chemistry of oxy-radicals in mitochondria and the radical-mediated metabolism of xenobiotics. The opening chapter describes the mechanisms of free radical production in enzymatically promoted lipid peroxidation, generally in microsomes or microsomal lipids. The subsequent chapters explore the biochemistry and biology of plant and animal lipoxygenases; the production of superoxide and hydrogen peroxide in mitochondria; and the biological role of these species in mitochondria and related systems. The discussions then shift to the effects of superoxide production in white blood cells, with an emphasis on an evaluation of the oxygen-dependent reactions of the important phagocytic cells, the monocytes, and the polymorphonuclear leukocytes. This volume further covers the formation and the role of oxy-radicals in the red blood cell, which is a very useful system for studying the protection of biological tissue against radical-mediated damage. A chapter presents a comprehensive review of the production of free radicals during the metabolism of xenobiotics. The last chapters provide an overview of the enzymology, biological functions, and free radical chemistry of glutathione peroxidase. These chapters also examine a number of gerontological principles and the effect of antioxidants in aging. Chemists, biologists, and physicists will find this book of great value.

Ecocriticism and the Idea of Culture - Helena Feder 2016-04-29

Ecocriticism and the Idea of Culture: Biology and the Bildungsroman draws on work by Kinji Imanishi, Frans de Waal, and other biologists to create an interdisciplinary, materialist notion of culture for ecocritical analysis. In this timely intervention, Feder examines the humanist idea of culture by taking a fresh look at the stories it explicitly tells about itself. These stories fall into the genre of the Bildungsroman,

the tale of individual acculturation that participates in the myth of its complete separation from and opposition to nature which, Feder argues, is culture's own origin story. Moving from Voltaire's Candide to Mary Shelley's Frankenstein and from Virginia Woolf's Orlando to Jamaica Kincaid's Lucy, the book dramatizes humanism's own awareness of the fallacy of this foundational binary. In the final chapters, Feder examines the discourse of animality at work in this narrative as a humanist fantasy about empathy, one that paradoxically excludes other animals from the ethical community to justify the continued domination of both human and nonhuman others.

Computational Molecular Biology - J. Leszczynski 1999-06-10

This book covers applications of computational techniques to biological problems. These techniques are based by an ever-growing number of researchers with different scientific backgrounds - biologists, chemists, and physicists. The rapid development of molecular biology in recent years has been mirrored by the rapid development of computer hardware and software. This has resulted in the development of sophisticated computational techniques and a wide range of computer simulations involving such methods. Among the areas where progress has been profound is in the modeling of DNA structure and function, the understanding at a molecular level of the role of solvents in biological phenomena, the calculation of the properties of molecular associations in aqueous solutions, computationally assisted drug design, the prediction of protein structure, and protein - DNA recognition, to mention just a few examples. This volume comprises a balanced blend of contributions covering such topics. They reveal the details of computational approaches designed for biomolecules and provide extensive illustrations of current applications of modern techniques. A broad group of readers ranging from beginning graduate students to molecular biology professions should be able to find useful contributions in this selection of reviews.

European Literature and Theology in the Twentieth Century - D. Jasper 1990-06-29

The central themes of this collection of essays are the mystery of time past, present and future, and the problem of redemption. They are concerned with modern literature, with the threat of meaninglessness in the postmodern condition, and with the possibility of salvation. In an age of deferral and difference, this book addresses itself to eschatology and apocalypse, and redemption in, through, but particularly of, time itself. Hell and madness are never far away, yet the refiguration of time and the breaking in of the transcendent continue to suggest theological possibilities beyond the wastelands of the twentieth century. To those possibilities we look in hope.

Basic College Mathematics: An Applied Approach, Student Support Edition - Richard Aufmann 2007-12-26

The Student Support Edition of Basic College Mathematics, 8/e, brings comprehensive study skills support to students and the latest technology tools to instructors. DFSMStvs Overview and Planning Guide - Dave Lovelace 2003

This IBM Redbooks publication describes how DFSMStvs works, how and when you might use it, and what you need to consider in your plans. This book should be of interest to you if you want to understand how you can increase the service hours of a CICS/VSAM system by reducing or eliminating the batch window, or if you want to run multiple concurrent batch jobs updating common VSAM data sets. This book is written for readers who have some knowledge of CICS, VSAM, and VSAM Record Level Sharing, and who wish to understand more about DFSMStvs. The book reviews how existing products work. It introduces DFSMStvs, offering more detail on how it works, how you might migrate to it, and how you can change your applications or write new applications to exploit it. This is a companion volume to the DFSMStvs Application Migration Guide, SG24-6972, which contains practical examples of migrating programs to run in a DFSMStvs environment, and the DFSMStvs Presentation Guide, SG24-6973, which contains an overview presentation of DFSMStvs.

Applied Electromagnetics - Martin A. Plonus 1978

Electronic Irradiation of Foods - R. B. Miller 2006-12-26

Food irradiation, the use of ionizing radiation to destroy harmful biological organism in food, is a safe, proven process that has many useful applications. It has been endorsed by numerous health organizations and has now been approved for many applications by governments around the world. Electronic Irradiation of Foods describes all the key aspects of electron accelerator technology in detail. It emphasizes the physical science and technology aspects of food irradiation using machine sources of ionizing radiation. The

book provides significant technical depth for interested workers and present descriptive, introductory material that should help demystify technology for businessmen to make informed choices regarding important investments decisions. Introductory chapters summarize the effects of ionizing radiation on biological organisms and the organic compounds comprising foods, and give an overview of the food irradiation process. Subsequent chapters cover the details of the electron beam and x-ray energy deposition, electron accelerator technologies, beam scanning systems, material handling systems, shielding design, and process control considerations. Important appendices cover radiation dosimetry, induced radioactivity, and ozone generation.
